Re: Statement in Support of Application for Conditional Use Approval for 4110, 4130, & 4160 Lisa Drive, Tipp City, Ohio 45371

Dear Board of Zoning Appeals Members:

This law firm represents US Truck Lines, LLC, an Ohio limited liability company ("US Truck Lines"), with respect to its use of the property located at 4110, 4130, & 4160 Lisa Drive, Tipp City, Ohio 45371 (the "Property").[1] US Truck Lines respectfully requests that the Bethel Township Board of Zoning Appeals (the "Board") codify its use of the Property as a motor freight depot, together with accessory semi-truck servicing and repair, self-storage, and dispatching.

I. STATEMENT OF FACTS

The Property is a 2.71-acre tract zoned for Light Industrial (I-1) uses that is located within the heart of Wiley Industrial Park. The adjacent parcels on all sides are zoned likewise and variously used as manufacturing facilities for specialty machines and tools, a self-storage facility, semi-truck repair shops, and a motor freight depot.

Since at least 2018, the Property has been used as a motor freight depot. US Truck Lines acquired the Property in 2021 with the intent of continuing that use and tailoring the Property to meet its business needs. Accordingly, soon after purchasing the Property, US Truck Lines established designated docking spaces for twenty-eight trucks on the and began construction on a now complete 4,980-square-foot structure. US Truck Lines principally uses the Property as a motor

[1] Miami County Auditor Parcel Nos. A01-087281, A01-087282, and A01-087283.

freight depot for transloading—the unloading, transfer, and reloading of freight. In connection with, and as an accessory to, that use, it uses the structure on the Property for short-term storage of freight being transloaded, as a repair shop for working on its own trucks, and as a dispatching office. It also uses ten of the docking spots on the Property to park its trucks and trailers in between shipments and leases the balance to third-parties for the same purposes—transloading and short-term parking.

II. THE PROPOSED USE FALLS WITHIN THE RESOLUTION'S INDUSTRIAL USE FRAMEWORK

However, US Truck Lines was recently made aware that the necessary zoning approvals were never obtained to permit the Property's current uses. It now seeks to bring the Property into compliance with the Bethel Township Zoning Resolution (the "Resolution" or the "BTZR") by requesting approval to use the Property as a motor freight depot, together with accessory semi-truck and trailer parking for its own trucks and those owned by others, servicing its own trucks, and dispatching (the "Proposed Use").[2] The Proposed Use falls within the industrial-use framework described below and, based on the surrounding land uses and the information presently available, can be operated without unreasonable impacts on neighboring properties. US Truck Lines therefore respectfully requests approval of the Proposed Use, without conditions, or subject to only narrowly tailored conditions supported by the record.

The primary consideration for the Board in determining whether to issue a conditional use certificate is the use's harmony with the Resolution. BTZR § 2.06(A)(4). The more specific standards in BTZR § 2.06(D)(3) direct the Board to consider nine factors addressing the Proposed Use's consistency with the Resolution and the Bethel Township Comprehensive Land Use Plan (the "Comprehensive Plan"); its compatibility with surrounding uses and potential impacts on the surrounding areas; and access to critical infrastructure and services. The Property is located within an industrial park, with industrial uses that are either identical or of a similar intensity on all sides. Those circumstances support approval without conditions or only narrowly tailored conditions if the record shows they are necessary.

a. EACH ASPECT OF THE PROPOSED USE IS PERMITTED

First, the components of the Proposed Use correspond to uses identified for I-1 districts. *See* BTZR § 2.06(D)(3)(a). BTZR § 12.04 lists among the uses conditionally permitted in an I-1 district: (i) "Motor Freight Depot or Trucking Transfer Terminal"; (ii) "Self-Storage Building and Storage Yards, Excluding Wrecking and Dismantling of Motor Vehicles"; and (iii) "Truck and Heavy Equipment Service."

The principal operation cleanly fits within the Resolution's motor-freight category. BTZR § 3.02 describes a "Truck Transfer Terminal" and "Motor Freight Depot" as land "used as a relay

[2] US Truck Lines is submitting an application for a zoning certificate to permit semi-truck and trailer repairs, based on the Resolution's identification of "Automobile, Truck, and Recreational Vehicle Repair" as a use permitted as of right. In submitting this application, US Truck Lines does not concede that conditional use approval is a prerequisite to carrying on that use on the Property.

Accordingly, the principal use is identified in the Resolution as a conditionally permitted I-1 use. Semi-truck and trailer servicing, short-term parking, and storage are directly related to that use and are reasonably viewed as necessary incidents to that principal use. Dispatching is an administrative function that supports on-site freight transfer and vehicle coordination. The requested operations should therefore be evaluated together as a coherent light industrial use and approved subject only to conditions necessary to mitigate excessive external effects.

b. THE PROPOSED USE ACCORDS WITH THE RESOLUTION AND COMPREHENSIVE PLAN

The Proposed Use must also be consistent with the general objectives set forth in the Resolution and Comprehensive Plan. *See* BTZR § 2.06(D)(3)(b). The information described above supports that finding. One of the Resolution's key purposes is to define the "peculiar suitability" of each district for particular uses based on the district's character. BTZR § 1.02. The I-1 district's inclusion of motor freight depots and truck service conclusively indicates, under the Resolution's plain language, that the Bethel Township Trustees have determined such activities are compatible with the district's industrial character. The district in question is therefore "peculiar[ly] suit[ed]" to the Proposed Use.

A limited dispatching office is also consistent with the Resolution's stated goal of lessening "congestion on public streets[.]" BTZR § 1.02. Coordinating the receipt, transfer, parking, and dispatch of freight on the Property is necessary to mitigate and avoid traffic-impeding queues, idling, and circulation on public roads. US Truck Lines does not suggest that a dispatch office will eliminate traffic; rather, it provides a practical means of organizing on-site activity and keeping trucks, to the extent feasible, within the Property while they await service or transfer. For that reason, the dispatching function supports the Resolution's purpose of reducing congestion.

The Proposed Use is also consistent with the Comprehensive Plan. The Comprehensive Plan designates the Property as part of an area selected for industrial planning and specifically calls for industrial uses of the Property. While "manufacturing and related retail uses" are identified as preferred uses, the Comprehensive Plan recognizes that "preferred land uses are just that, preferred"—not exclusive. The Proposed Use supports the preferred industrial activity by providing transfer, staging, and service capacity for manufacturers in the Miami Valley and beyond. Further, the information presently available does not show that the Proposed Use would displace a preferred use or conflict with the industrial planning designation. Accordingly, the fact that trucking and logistics are not identified as preferred uses does not make the Proposed Use inconsistent with the Comprehensive Plan, especially given the use's necessity to carrying on a preferred use.

c. WILEY INDUSTRIAL PARK IS A HAVEN FOR THE TRUCKING INDUSTRY

The Board must also consider whether the Proposed Use is harmonious with the character of the area in question or whether it would alter its essential characteristics. *See* BTZR § 2.06(D)(3)(c). The surrounding uses support compatibility. The Property lies within Wiley Industrial Park. Based on the available information, of the forty-two distinct developments within that area, a full third use their properties to functionally the same uses, including one owner on the other side of Lisa Drive. A number of other owners principally use their properties for an accessory

aspect of the Proposed Use, especially semi-truck repair. Approving the Proposed Use would therefore be consistent with the park's existing pattern and would reinforce, rather than materially change, its essential character.

d. THE PROPOSED USE CAN OCCUR WITHOUT UNREASONABLE HAZARDS OR DISRUPTIONS

Neither will the Proposed Use create unreasonable hazards for or disruptions to neighboring land users, another factor the Board must consider. *See* BTZR § 2.06(D)(3)(d). The Proposed Use does not involve manufacturing or the production, handling, or storage of caustic, flammable, or explosive compounds. It does not require continuous operation of manufacturing machinery or a steady flow of retail customers. The proposed activities—freight receipt and transfer, truck and trailer service, short-term parking, storage, and dispatch—are industrial in character. They do not present extraordinary traffic, noise, or safety considerations, and nothing in the information presently available indicates an unusual or unmanageable hazard.

Nor should the Proposed Use be disruptive if operated as described. It will be carried on within the heart of an industrial park dominated by those involved in the same industry. Potential impacts can be limited through ordinary site-management measures, including conducting repairs indoors where feasible, prohibiting unnecessary idling, and coordinating truck movements so that vehicles do not queue on public roads. If the Board identifies a specific concern, it can address that concern through a reasonable, narrowly tailored condition rather than by denying the application outright.

e. EXTERNAL EFFECTS CAN BE MITIGATED

The Board must also consider whether the Proposed Use would adversely affect particular persons or property or the general welfare, through the "excessive production of traffic, noise, smoke, fumes, glare, or odors." BTZR § 3.06(D)(3)(g). US Truck Lines acknowledges that semi-trucks generate some traffic, noise, and exhaust and that truck service can generate additional noise. But the relevant question is whether those impacts would be excessive in this setting. The Property can accommodate no more than twenty-eight trucks at a time, is located in an industrial park, and is surrounded on all sides by industrial users. Those circumstances support a finding that the impacts will be limited and manageable.

If the Board identifies a specific impact, it can address it with a narrowly tailored condition rather than deny approval outright. If, based on the evidence presented, the Board has concern with the Proposed Use's effects, appropriate conditions could include limiting idling by parked trucks, requiring that repairs occur inside the structure on the Property, and limiting truck arrivals and departures outside peak traffic hours. Again, the Proposed Use's impacts can hardly be classified as "excessive" under the circumstances, but the solution to preventing these impacts is not to withhold conditional approval. The remedy is to impose conditions tied to a demonstrated concern and framed to mitigate the concern without unnecessarily restricting a use the Resolution contemplates in the I-1 district.

f. THE PROPERTY HAS ADEQUATE ACCESS TO INFRASTRUCTURE AND SERVICES

Section 2.06(D)(3)(e) of the Resolution also directs the Board to consider whether the Property has adequate access to critical infrastructure and services needed to carry on the Proposed Use safely. The circumstances presented for review support such a finding. The Property is located on Lisa Drive, which has direct access to U.S. Highway 40 via Wildcat Road and State Route 202 by way of Gibson Drive. This access point provides ready access for ordinary and emergency vehicles. Further, the Property's center is entirely unoccupied, leaving ample room for emergency response vehicles to maneuver. The Proposed Use is nonresidential and therefore will not create additional demand for school capacity.

g. THE PROPERTY HAS SUFFICIENT INGRESS AND EGRESS TO AVOID MATERIAL INTERFERENCE WITH TRAFFIC

The Board must also consider whether the Property has adequate vehicular approaches to avoid interfering with traffic on surrounding public roads. *See* BTZR § 2.06(D)(3)(h). The Property is accessed from Lisa Drive, a side street whose traffic is largely limited to those doing business within Wiley Industrial Park, through an approximately 136-foot-wide access lane. The minimal traffic on Lisa Drive and the distance between the Property and any major roadways supports the conclusion that the Property is sufficiently accessible to avoid material impacts on traffic.

h. THE PROPOSED USE IS CONSISTENT WITH THE TOWNSHIP'S FISCAL AND ECONOMIC INTERESTS

The Board must also consider whether the Proposed Use would impose an excessive burden on the public fisc and the extent to which it would contribute to the Township's economic well-being. *See* BTZR § 2.06(D)(3)(f). Any impacts that the Proposed Use will have on the treasury are nugatory. It will not necessitate infrastructure improvements on Lisa Drive. Its draw on utilities is minimal, especially for a Light Industrial use. It does not add additional burdens on Bethel Township schools as it is not a residential development. On this record, the Proposed Use is not expected to impose a material burden on public resources.

Instead, the Proposed Use will contribute to the Township's economic health by supporting industrial and logistics activity in an area designated for such uses. It would provide logistics services for manufacturers in the Miami Valley and beyond. Its location within an established industrial park, well away from residential developments, largely eliminates its impacts on residential property values. Thus, the Proposed Use will contribute to the Township's economic wellbeing without draining public resources.

i. THE PROPERTY LACKS NATURAL, SCENIC, OR HISTORIC FEATURES

Finally, the Board must consider whether approval would result in the destruction or loss of "natural, scenic, or historic features of major importance." BTZR § 2.06(D)(3)(i). The Proposed Use will have none of these effects. The Property sits within an industrial park, which are not renowned for natural or scenic beauty, and Wiley Industrial Park is no different. The Property has

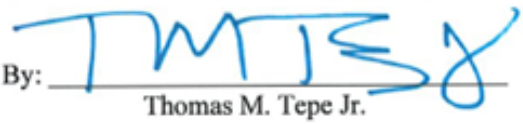

no historical significance, and has not been designated as a historic landmark. Regardless, the Proposed Use is just that—a use. It will not involve any new developments that have not already been permitted and will not result in the loss of a protected feature, even of minor importance.

III. THE BOARD SHOULD GRANT CONDITIONAL-USE APPROVAL

In sum, the Proposed Use is consistent with the Resolution, the Comprehensive Plan, and the character of Wiley Industrial Park. It will have minimal impacts on neighboring properties, traffic, and public resources, none of which are incapable of being managed through reasonable, appropriately tailored conditions. US Truck Lines seeks approval to bring the Property's existing and intended operations into compliance and to continue using it as a motor freight depot and trucking transfer terminal, with the related parking, servicing, repair, self-storage, and dispatching functions described above. On behalf of US Truck Lines, we therefore respectfully request that the Board approve the Proposed Use without conditions, or otherwise subject only to conditions supported by the record and tailored to address a specific concern.

Respectfully submitted,
